1. Introduction

1.1 Objective

The objective of the Job Portal is to enable jobseekers to place their resumes and find appropriate jobs while companies to publish their vacancies and find good candidates for the suitable job.

1.2 Intended Users

- Administrator
- Job Seeker
- Job Provider/Company

1.3 Project Scope

Job portal is developed for creating an interactive job vacancy Portal for candidates. It enables jobseekers to post their resume, search for jobs, view personal job listings. It will provide various companies to place their vacancy profile on the site and also have an option to search candidate resumes. Scope of the website can be huge as job seeking is easy online.

2. Overall Description

2.1 Product Perspective

The website is designed keeping in mind the problem faced by people when searching for a job on multiple different websites and for companies to seek for candidates for their vacant job spot. This website provides both the platform to job seeker to find multiple job options at a click.

2.2 Product Features

- Search jobs on the basis of skills, city, job title
- Register and login as a jobseeker or as a job provider
- About Us
- Contact us
- Recent Jobs

2.3 Usage by Different Users

- **Admin**

Maintain database and notify the users if required data is not appropriate. Admin can update the policy terms and contact details. Admin can keep a check on posts by companies and resume by job seeker and overall functionality of the website.

- **Job Seeker**

Job seeker can search for jobs, apply online for desired job and also Add/Edit profile information including qualification, experience, and skills.

- **Job Provider**

Job Provider can :

- Add / Edit company's profile
- Post new job vacancies
- Edit / Deactivate posted jobs
- Job provider can see the list of jobseekers who has applied for the job
- Job provider can search jobseekers

2.4 Operating Environment

The website is designed in html, CSS, JavaScript and PHP.

Can be used on any device via web browser.

Hardware Requirements:

- Processor:i3 or above
- Ram:3GB or above

Software Requirements:

- Visual studio code/Sublime Text
